Phase 3 — UX Architecture & Low-Fidelity Wireframes (Revised)

Project: Index — Curated Consumer Electronics Review & Comparison Platform

Phase Status: Complete production-grade UX blueprint. No code written.

Awaiting: Your approval before Phase 4.

Table of Contents

1. Implementation Readiness Checklist
2. Homepage Hierarchy & Section Priorities
3. Product Page — Complete Specification
4. Comparison UX — Edge Cases & Deep Dive
5. Mobile UX — First-Class Experience
6. Search UX — Complete Specification
7. Editorial Standards
8. Accessibility Architecture
9. Empty States — Complete Inventory
10. Error Recovery Flows
11. Animation Rules — Per Interaction
12. SEO Structured Data Placement
13. End-of-Phase Handover

1. Implementation Readiness Checklist

Before any code is written, the following must be true. This checklist is verified at

the end of this document.

#	Requirement	Status
1	Every page has a documented layout	
2	Every component has a defined purpose	
3	Every interaction is documented	
4	Every loading state exists	
5	Every error state exists	
6	Every accessibility requirement is defined	
7	Every responsive behavior is documented	
8	No UI decisions remain unresolved	
9	All edge cases are documented	
10	All animation timings are specified	
11	All SEO schemas are mapped per page	
12	All empty states	

2. Homepage Hierarchy & Section Priorities

Exact Section Order (Top to Bottom)

Section	Priority	Above Fold	Optional	Removable in Future?	Justification
Navbar	Critical	Yes	No	No	Navigation is required on every page.
Hero	Critical	Yes	No	No	Value proposition must be immediate.
Categories Grid	Critical	Yes	No	No	Primary path for browsers. Enables instant category discovery.
Featured Products	Critical	Yes	No	No	Proof of editorial quality. Drives product pageviews.
Stats	Import	No	No	Yes	Trust

Generated by Kimi.ai

Row	ant	No	Yes	Yes	signal. Can be merged into About page if homepage becomes too long.
CTA Banner (News letter)	Important	No	No	No	Primary retention mechanism . Must exist on every page in some form.
FAQ	Important	No	Yes	Yes	Objection handling. Can move to About/ Methodology if homepage length is a concern.
Newsletter Footer Section	Critical	No	No	No	Final capture opportunity. Required on all pages.

Footer	Critical	No	No	No	Legal, navigation, disclosure. Required.
--------	----------	----	----	----	---

Above-the-Fold Definition

Desktop (> 1024px): Sections 1–4 visible without scroll on a 1080p display.

Tablet (768–1023px): Sections 1–3 visible. Featured Products begins at fold line.

Mobile (< 768px): Sections 1–2 fully visible. Categories Grid partially visible (first 2 rows) to invite scroll.

Section Removal Rules

- Stats Row: Can be removed in V2 if A/B testing shows no conversion lift.
Replaced with a single trust line in the hero subheadline.
- Testimonials: Can be removed if we add user reviews/ratings in V2.
- FAQ: Can be removed if we implement a global help center. Homepage FAQ then links to that.

Section Priority Legend

- Critical: Page cannot ship without this. Removing it breaks the user journey or violates legal requirements.
- Important: Strongly recommended. Removing it degrades conversion or trust but does not break functionality.
- Optional: Nice to have. Can be A/B tested or deferred.

3. Product Page — Complete Specification

This is the most important page on the website. Every element is intentional.

Page Header Metadata

- URL Pattern: `/ {category} / {product-slug}`

- Canonical: Self-referencing absolute URL.
- Title Template: {Product Name} Review ({Year}) | Index
- Meta Description: Quick verdict (first 160 characters).

Section 3.1: Breadcrumb

Exact Content: Home > {Category Name} > {Product Name}

Visual Hierarchy: 1. Home (link, --muted) 2. Separator (/, --muted, 16px) 3. Category Name (link, --muted) 4. Separator 5. Product Name (plain text, --foreground, weight 500)

Placement: Directly below navbar. space-4 vertical padding. Bottom border 1px solid --border.

Mobile Adaptation: Truncate middle segment if path is deep: Home > ... > {Product}.

Accessibility: - nav with aria-label="Breadcrumb" - ol > li structure - Current page: aria-current="page" - Keyboard: Tab through links. Current page not focusable.

SEO: BreadcrumbList JSON-LD.

Section 3.2: Product Hero

Purpose: Present all critical decision-making information above the fold. This section alone should answer 80% of a user's questions.

Layout Structure (Desktop):

GALLERY (55%) INFO BLOCK (45%)

[Main Image 4:3] [caption] APPLE

[heading-1] MacBook Pro 16 (2026)

[t1][t2][t3][t4]

9.2/10 [Link: How we score →]

[Score Badge: 9.2] [Badge: Best Overall]

[body] Our verdict: The best laptop for professionals who need raw performance and battery life in a premium package.

Key Specs:

- M3 Max Chip • 36GB RAM • 1TB SSD
- 22hr Battery • 16.2" Display

Price: \$2,499

[Primary: Check Price at Amazon]

[Secondary: Add to Compare]

[caption] Updated 3 days ago

[Trust: Independent Review] [Trust: Tested]

Visual Hierarchy (Reading Order): 1. Brand name (caption, uppercase, --muted) — establishes manufacturer authority. 2. Product title (heading-1) — confirms the user is on the correct page. 3. Rating stars + score + “/10” + methodology link — instant trust signal. 4. Score badge (large, color-coded) + award badges — visual anchor. 5. Quick verdict (body, 1–2 sentences) — executive summary for scanners. 6. Key specs (3–4 bullet points) — technical preview for researchers. 7. Price box — conversion driver. 8. Trust badges — final reassurance before CTA.

Score Badge Specification: - Shape: Circular, 80px diameter. - Color Logic: - 9.0–10.0: --success (green) - 7.0–8.9: --accent (blue) - 5.0–6.9: --warning (yellow/amber) - < 5.0: --danger (red) - Text: Score number (heading-3, white), “/10” (caption, white/80%). - Placement: Top-right of info block, aligned with title baseline.

Award Badges: - “Best Overall”, “Best Value”, “Editor’s Choice” - Pill shape, radius-full, --accent background, white text. - Placed immediately below score badge or inline with title row.

Price Box Specification: - Background: --surface - Border: 1px solid --border - Radius: radius-lg - Padding: space-6 - Contents: - Current price: heading-3, weight 700, --foreground - Original price (if sale): body, --muted, strikethrough, positioned right of current price - Retailer: Logo + name, body-small, --muted - Primary CTA: Full-width, large button - Secondary CTA: Full-width, outline button - Last updated: caption, --muted

Trust Badges (Below Price Box): - “Independent Review” (shield icon) - “Hands-On Tested” (checkmark icon) - “Transparent Methodology” (info icon) - Inline row, caption, --muted. Icons 16px.

Gallery Behavior: - Main Image: 4:3 aspect ratio, radius-lg. Click opens lightbox. - Thumbnails: 4–6 images, 80px square, radius-md, horizontal row below main image. - Active Thumbnail: Border 2px solid --accent. - Lightbox: Full-screen overlay. Main image centered. Navigation arrows (left/right). Thumbnail strip at bottom. Close (X) top-right. Escape to close. - Mobile: Thumbnails replaced by swipeable carousel indicators (dots). Swipe gesture on main image changes image. Lightbox still available via tap.

Affiliate CTA Placement: - Desktop: Inside price box, full-width, large size. - Mobile: Price box moves to sticky bottom bar (see Mobile UX section). Hero shows price only, no button.

Quick Verdict Block: - Max 2 sentences. - Positioned directly below title/rating. - body size, --foreground. - If no verdict is available (review draft), show: "Full review in progress. Specifications and pricing available below."

Author Information: - Not shown in hero. Reserved for blog/guides. Product reviews are team-authored. - If single author: Show below review body as "Reviewed by [Name], [Date]". - If editorial team: Show "Index Editorial Team" with team avatar.

Last Updated: - Shown in price box: "Updated 3 days ago". - Also shown below review body: "Last updated: [Date]". - Format: Relative if < 30 days ("3 days ago"), absolute if older ("January 15, 2026").

Reading Time: - Not shown on product pages. Product pages are evaluated, not read linearly. - Reserved for blog posts and buying guides.

Section 3.3: Review Body (The Verdict)

Purpose: Deliver the editorial justification for the score.

Exact Structure:

[heading-2] The Verdict

[body-large] Executive summary paragraph (3–5 sentences). This is the most important text on the page. It must be compelling enough that a user who reads only this feels informed.

[heading-3] Performance

[body] 2–3 short paragraphs. Maximum 300 words per subsection.

[Image: Full-width, 16:9, with caption]

[heading-3] Display

[body] 2–3 short paragraphs.

[heading-3] Battery Life

[body] 2–3 short paragraphs.

[heading-3] Build Quality & Design

[body] 2–3 short paragraphs.

[heading-3] Value for Money

[body] 2–3 short paragraphs.

Content Rules: - Maximum paragraph length: 5 sentences. No walls of text. -

Subsection order: Performance → Display → Battery → Build → Value. This follows the priority of user concerns based on research. - Image frequency:

Minimum 1 image per 2 subsections. Maximum 1 image per subsection. -

Caption style: caption, –muted, centered below image.

Placement: Below hero. Max-width 720px, centered within container.

CTA: Contextual affiliate links within body text (e.g., “We tested the [Dell XPS 15] alongside this model”). These are inline text links, not buttons.

Section 3.4: Pros & Cons

Purpose: Scannable decision aid. Most users read this before the full review body.

Exact Layout:

[heading-4]

Pros

[heading-4]

Cons

- Exceptional performance

• Expensive

• Stunning Mini-LED display

• Limited ports

• 22-hour battery life

• Heavy at 2.14 kg

• Premium build quality

• Excellent speakers

Rules: - Maximum items: 5 per list. If more exist, show top 5 and “See full review for more.” - Minimum items: 3 per list. If fewer, do not show the section; integrate into review body instead. - Icons: Checkmark for Pros (Lucide Check, --success), X for Cons (Lucide X, --danger). - Borders: Left border 4px, color matches icon. Placement: Below review body. Max-width 720px, centered. Mobile: Stacked. Pros first, Cons second. Full width each.

Section 3.5: Score Breakdown

Purpose: Transparent scoring. Justify the overall number.

Exact Layout:

[heading-3] Score Breakdown

Performance	10/10
Display	9/10
Battery	9/10
Build Quality	10/10

Value 6/10

Overall 9.2/10

Rules: - Categories: Performance, Display, Battery, Build Quality, Value. Always these 5 for consistency. - Bar style: 10 segments. Filled segments use score color. Empty segments use --divider. - Overall score: Separated by horizontal rule. Larger text. - Tooltip: Hovering a bar shows exact score and a 1-sentence explanation. Placement: Below Pros & Cons. Max-width 720px, centered. Mobile: Same layout. Bars scale to container width.

Section 3.6: Testing Methodology Block

Purpose: Reinforce trust by showing how the product was evaluated.

Exact Layout:

[Icon: Flask] How We Tested This Product

This product was tested over 40 hours across 12 benchmarks.

We evaluate performance, display accuracy, battery endurance, thermal management, and real-world productivity workflows.

[Link: Read our full methodology →]

Style: --info left border (4px), radius-md, --surface background, space-6 padding.

Placement: Below Score Breakdown. Max-width 720px, centered.

Mobile: Same.

Section 3.7: Specifications

Purpose: Technical details for researchers and comparison shoppers.

Exact Layout:

[heading-3] Specifications

Display	16.2" Liquid Retina XDR, 3456×2234
Processor	Apple M3 Max (16-core CPU, 40-core)
Memory	36GB Unified Memory
Storage	1TB SSD
Ports	3× Thunderbolt 4, HDMI, SDXC, MagSafe
Battery	100Wh, up to 22 hours

Weight	2.14 kg
--------	---------

Dimensions	35.57 × 24.81 × 1.68 cm
------------	-------------------------

Rules: - Label column: caption, uppercase, --muted, width 30%. - Value column: body-small, --foreground, Geist Mono for technical values. Width 70%. - Borders: Horizontal dividers only (--divider). No vertical borders. - Missing values: Show “—” (--muted). Never hide the row.

Placement: Below Testing Methodology. Max-width 720px, centered.

Mobile: Single column stack. Label above value.

Section 3.8: Comparison Teaser

Purpose: Drive users to compare with alternatives.

Exact Layout:

[heading-3] Compare with Similar Laptops

[Image]	[Image]	[Image]
Dell XPS 15	ThinkPad X1	Razer Blade
\$1,899	\$1,799	\$2,999
[+ Compare]	[+ Compare]	[+ Compare]

[Secondary: See Full Comparison →]

Rules: - Products: 3 products from the same category, excluding current product. - Selection logic: Best Overall, Best Value, and one other high-rated product from the category. - Cards: Compact (image, title, price, compare button). Placement: Below Specifications. Full width. Mobile: Horizontal scroll, snap to card.

Section 3.9: Related Products

Purpose: Cross-sell within category or complementary categories.

Exact Layout:

[heading-3] You Might Also Like

[4 Product Cards in grid]

Rules: - Selection: Products from same category or complementary categories (e.g., laptop → mouse, monitor). - Max: 4 products.

Placement: Below Comparison Teaser.

Mobile: 2-column grid or horizontal scroll.

Section 3.10: Product FAQ

Purpose: Address specific objections. Rich snippet opportunity.

Exact Layout:

[heading-3] Common Questions

Is this good for video editing?

[body] Yes. The M3 Max handles 8K ProRes timelines...

How does it compare to the 14-inch model?

[body] The 16-inch offers significantly better...

Is the M3 Max worth the upgrade from M2 Max?

[body] For most users, the M2 Max remains...

Rules: - Minimum: 3 questions. Maximum: 8. - Questions: Must be genuine user questions, not fabricated for SEO. - Answers: Max 3 sentences. Link to full review sections for detail.

Placement: Below Related Products. Max-width 720px, centered.

SEO: FAQPage JSON-LD.

Section 3.11: Affiliate Disclosure Banner

Purpose: Legal compliance and trust reinforcement.

Exact Layout:

[body-small] Index earns a commission when you purchase through our links.

This does not affect our editorial independence. [Link: Learn more →]

Style: Full-width, --secondary background, centered text, space-4 vertical padding.

Placement: Above footer on every product page. Also repeated in footer.

Section 3.12: Newsletter CTA

Purpose: Capture users not ready to purchase.

Exact Layout:

[heading-3] Not ready to buy?

[body] Get our next recommendation delivered to your inbox.

[Email Input] [Subscribe]

Placement: Below disclosure banner. Centered, max-width 480px.

Product Page Section Order Justification

#	Section	Reason for Position
1	Breadcrumb	Orientation. Must be first.
2	Hero	All critical info above fold. Score + Price + CTA within 2 seconds.
3	Review Body	Justifies the score for users who need depth.
4	Pros & Cons	Scannable summary for users who skip body text.
5	Score Breakdown	Transparency. Answers “How did you arrive at this score?”
6	Testing Methodology	Trust reinforcement. Addresses skepticism mid-page.
7	Specifications	Technical details for researchers. Lower priority than editorial content.
8	Comparison Teaser	Contextual cross-navigation. Shown after user has absorbed product info.
9	Related Products	Cross-sell. Shown after primary evaluation is complete.
10	Product FAQ	Objection handling. Late in page because most users don’t need it.
11	Disclosure	Legal. Before footer.

12 Newsletter Capture non-buyers at the bottom of the funnel.

4. Comparison UX — Edge Cases & Deep Dive

Comparison States

State: Empty (0 Products)

Layout:

[heading-1] Compare Products

[body] Start comparing to find the best option for your needs.

[Search Input: Search products to compare...]

[Popular Suggestions: Laptops, Smartphones, Headphones]

Recovery: User types in search or clicks a suggestion. First product added immediately.

State: One Product (1 Product)

Layout:

[heading-1] Compare Laptops

[body] Comparing 1 product. Add at least one more to see differences.

[Product Column: Full product info]

[Empty Column: "Add another product" with search input]

Behavior: Table shows single column. Empty columns (up to 3) show "Add Product" placeholders with search inputs.

State: Optimal (2–3 Products)

Layout: Full comparison table. All features visible. No horizontal scroll on desktop (if 2–3 products).

State: Maximum (4 Products)

Layout: Full comparison table. Horizontal scroll may be needed on smaller desktops. First column (labels) sticky.

Enforcement: "Add Product" button disabled. Tooltip: "Compare up to 4 products."

Toast on attempted add: "Maximum 4 products. Remove one to add another."

Edge Cases

Missing Specification Values

- Display: Show "—" in the cell.
- Visual: –muted color. Slightly reduced opacity (0.6).
- Tooltip: Hover shows "Specification not available."

Unavailable Products

- Definition: Product exists in CMS but is marked as discontinued or out of stock.
- Display: Grayed out column (opacity 0.6). Badge: "Discontinued" or "Out of Stock".
- CTA: Button disabled. Text: "Currently Unavailable".
- Behavior: Still comparable. Users may want to see how it stacks up for reference.

Discontinued Products

- Badge: "Discontinued" pill, –muted background.
- Price: Show last known price with strikethrough. Text: "Last known price: \$X".
- CTA: Disabled.

Products Without Pricing

- Display: "Price unavailable" in –muted.
- CTA: "Check Availability" (links to retailer homepage, not product page).
- Tracking: Still tracked as affiliate click.

Affiliate Unavailable

- Definition: Product has no affiliate URL configured.

- Display: CTA button shows “View at Retailer” instead of specific retailer name.
- Behavior: Links to product page on retailer site without affiliate parameters.
- Disclosure: Still shown. Commission may not be earned.

Loading State

- Table Skeleton: 5 rows × 3 columns. Header row with image placeholders.
Data rows with text lines.
- Behavior: Skeleton shown while products are fetched. If products are already in cache (from category page), show instantly.

Comparison Summary Block (Below Table)

[heading-3] Our Pick

[Image] MacBook Pro 16 (2026)

9.2/10 Best Overall

The best choice for professionals who need maximum
performance and battery life.

[Primary: Check Price at Amazon]

Also Great Card: Runner-up with brief justification.

5. Mobile UX — First-Class Experience

Philosophy

Mobile is not a shrunken desktop. It is a distinct context with distinct constraints:

- Thumb reach zones (bottom-center is easiest).
- Limited horizontal space (no side-by-side comparison tables without scroll).
- Interrupted attention (shorter

sessions, more distractions). - Touch targets (minimum 44px).

Global Mobile Patterns

Navbar

- Height: 56px (reduced from 64px).
- Left: Hamburger menu.
- Center: Logo.
- Right: Search icon + Theme toggle.
- Scroll behavior: Backdrop blur + border appears after 16px scroll.

Sticky Bottom Bars

Product Page Affiliate CTA Bar: - Height: 72px. - Position: Fixed bottom. - Contents: Price (left), "Check Price" button (right, large). - Behavior: Appears after user scrolls past hero. Hidden when hero is visible (to avoid duplication). - Z-index: Above content, below modals. - Dismissible: No. Persistent. This is the primary conversion path. - Safe area: Respects iOS home indicator (`env(safe-area-inset-bottom)`).

Comparison Bar (Global): - Height: 56px. - Position: Fixed bottom. - Contents: "Comparing 2 products" + "Compare Now" button. - Behavior: Appears when 1+ products in comparison list. - Expand: Swipe up or tap to open drawer showing product thumbnails.

Page-Specific Mobile Adaptations

Homepage

- Hero: Centered text. heading-1 reduces to 36px. Stacked CTAs (Primary full-width, Secondary full-width below).
- Categories: 2-column grid. Icons 20px.
- Featured Products: 1-column stack. Full-width cards.
- Stats: 2x2 grid.
- CTA Banner: Input and button stacked, full-width.
- FAQ: Full-width accordion.

Category Page

- Filter Bar: Horizontal scroll for filter pills. Sort as native <select> or compact dropdown.
- Product Grid: 1-column stack.
- Product Card: Full width. Image 16:9 (instead of 4:3) for better mobile aspect ratio.
- Compare Button: Visible on card (not hidden behind hover).

Product Page

- Hero: Stacked. Gallery is swipeable carousel (no thumbnails). Dots indicate position.
- Info Block: Below gallery. Price shown but CTA removed (moved to sticky bottom bar).
- Review Body: Full width, 16px padding.
- Pros & Cons: Stacked. Full width each.
- Score Breakdown: Bars scale to full width.
- Specifications: Single column. Label above value.
- Comparison Teaser: Horizontal scroll, snap to card.
- Related Products: 2-column grid.
- Sticky Bottom CTA: Appears after scrolling past hero.

Comparison Page

- Default View: Card View.
 - Each product is a full-width card.
 - Horizontal swipe between product cards (like a carousel).
 - Vertical scroll within each card shows feature list.
 - Bottom indicator: “Product 1 of 3”.
 - “Check Price” button per card.
- Table View Toggle: Button at top switches to horizontal scroll table.
 - First column (labels) sticky left.

- Header row sticky top.
- Swipe hint on first load: “Swipe to compare →” (fades after 3s).

Buying Guide / Blog

- Hero: Stacked. Image full-width.
- TOC: Horizontal scroll pill list below hero. No sticky sidebar.
- Body: Full width, 16px padding.
- Inline Product Cards: Full width.
- Images: Full width, no float.

Thumb Reach Considerations

- Primary CTAs placed in bottom-center of screen (sticky bars).
- Navigation actions (back, close) placed top-left or top-right.
- Compare toggle on product cards: Right side, vertically centered.
- Search icon: Top-right (easy reach for right-handed users).

Mobile Spacing Adjustments

- Section padding: Reduced by 40% from desktop.
 - Desktop space-20 (80px) → Mobile space-12 (48px).
- Card internal padding: space-4 (16px) instead of space-6 (24px).
- Grid gaps: space-4 (16px) instead of space-6 (24px).
- Typography: heading-1 36px, heading-2 28px, body-large 16px.

Collapsible Sections (Mobile)

- Product Page Specifications: Collapsible accordion on mobile if spec list is long (> 8 items). Default: expanded.
- Buying Guide TOC: Collapsible on mobile. Default: expanded as pill list.

6. Search UX — Complete Specification

Search Modal States

Closed State

- Trigger: Search icon in navbar or cmd+k / ctrl+k.
- Visual: Search icon only.

Open State

- Backdrop: --overlay, fade in 200ms.
- Modal: --surface-elevated, radius-lg, max-width 640px, centered.
- Input: 48px height, auto-focused, placeholder "Search products, reviews, and guides..."
- Keyboard shortcut hint: Below input, caption, --muted: "Press K to search from anywhere"

Typing State

- Debounce: 300ms after last keystroke.
- Loading Indicator: Spinner (20px) below input, left-aligned. Text: "Searching..."
- Minimum query length: 2 characters. Below 2: show recent/popular searches only.

Results State

- Grouping:

Products

[Image 40px] MacBook Pro 16 (2026) Laptop 9.2

[Image 40px] Dell XPS 15 Laptop 8.7

Buying Guides

How to Choose a Laptop in 2026 12 min read

Categories

Laptops 24 products

- Max per group: 5 items.
- Highlight: Matching text in results is bold (–accent).

No Results State

- Icon: SearchX, 48px, –muted.
- Title: heading-4, “No results for ‘[term]’”
- Description: body, “Try different keywords or browse our categories.”
- Actions: 3 popular category pills (Outline buttons).

Keyboard Navigation

- / or cmd+k: Open search (if not in input field).
- ↑↓: Navigate results.
- Enter: Select highlighted result.
- Escape: Close modal.
- Tab: Input → Result 1 → Result 2 → ... → Close button → Input.
- Focus trap: Tab cycles within modal when open.

Recent Searches

- Storage: localStorage, key index_recent_searches.
- Max items: 5.
- Expiration: None (persistent until manually cleared).
- Display: Below input when query is empty. Header: “Recent” with “Clear” link.
- Privacy: Client-side only. No server transmission.

Popular Searches

- Source: Hardcoded list of high-value queries for V1.
- Examples: “best laptops 2026”, “macbook pro review”, “best wireless headphones”, “gaming monitor”.
- Display: Below recent searches when query is empty. Header: “Popular”.

Search Page (/search?q=term)

- Layout: See Page: Search in previous Phase 3 document.

- Additional specs:
 - Typo Tolerance: Sanity GROQ match does not support fuzzy matching. V1 shows exact matches only. If no exact matches, show “Did you mean: [suggestion]?” (suggestion derived from similar product names in CMS).
 - Filter Tabs: All / Products (N) / Guides (N) / Categories (N). Counts update dynamically.
 - Pagination: 20 results per page.

Analytics Events

- Search initiated: Query term, result count, time to results.
- Result clicked: Query, result type, result rank, destination.
- No results: Query term (logged for content gap analysis).
- Filter used: Tab selected after search.

Search Ranking Priorities

14. Product name exact match
15. Product name partial match
16. Category name match
17. Blog post title match
18. Blog post content match

7. Editorial Standards

Content Structure Rules

Paragraph Length

- Maximum: 5 sentences per paragraph.
- Target: 3 sentences.
- Reason: Web readers scan. Short paragraphs create rhythm.

Image Frequency

- Minimum: 1 image per 2 subsections in product reviews.
- Maximum: 1 image per subsection.
- Buying guides: 1 image per 500 words.
- Aspect ratios: 16:9 for hero/section headers, 4:3 for inline product shots, 1:1 for thumbnails.

Pull Quote Frequency

- Maximum: 1 per 1000 words.
- Placement: Must break up a long section (minimum 3 paragraphs before).
- Content: Must be a genuinely compelling sentence from the review, not fabricated.

Callout Usage

- Info callout: Tips, context, “Did you know?”
- Warning callout: Compatibility issues, known bugs, “Not recommended for...”
- Maximum: 2 per article. Overuse dilutes impact.

Comparison Tables Inside Articles

- Usage: Only for comparing 3–5 specific products within a guide.
- Style: Same as global comparison table but simplified (no sticky header, no affiliate CTA inside table).
- CTA: Below table, link to full comparison page.

Code Block Styling

- Usage: Rare. Only for technical tutorials (e.g., “How to check your laptop specs”).
- Style: Geist Mono, 14px, –surface background, radius-md, space-4 padding, horizontal scroll.

Embedded Videos

- V1: Not supported. Link to YouTube with thumbnail preview only.
- Future: Native embed with lazy loading.

Product Cards Inside Articles

- Style: Compact card. Image (80px), title, price, “Check Price” button.
- Placement: Within “Our Top Picks” sections or inline after relevant paragraphs.
- Maximum: 4 per article.

Reading Progress Indicator

- Placement: Top of viewport, 2px height, --accent color.
- Behavior: Width scales with scroll percentage of article body.
- Mobile: Hidden (saves vertical space).

Estimated Reading Time

- Calculation: Word count / 200 words per minute.
- Display: In hero, next to badge. Format: “X min read”.
- Mobile: Same.

Social Sharing

- Placement: Sticky sidebar on desktop (left of content, vertical). Bottom of article on mobile.
- Buttons: Copy link, Twitter/X, LinkedIn.
- Behavior: Copy link shows toast “Link copied”.

Related Articles

- Placement: Bottom of article.
- Selection: Same category, excluding current. Max 3.
- Style: Blog cards, 3-column grid.

8. Accessibility Architecture

Focus Order (Per Page)

Homepage

19. Skip Link (“Skip to main content”)
20. Logo
21. Navigation links (Categories, Reviews, Guides, About)

22. Search icon
23. Theme toggle
24. Hero heading
25. Hero primary CTA
26. Hero secondary CTA
27. Category cards (left to right, top to bottom)
28. Featured product cards
29. Newsletter input
30. Newsletter submit
31. Footer links

Product Page

32. Skip Link
33. Breadcrumb links
34. Gallery thumbnails (left to right)
35. Main image (if interactive)
36. Score/methodology link
37. Price box CTA
38. Add to Compare button
39. Review body headings (sequential)
40. Pros/Cons lists
41. Score breakdown bars
42. Comparison teaser cards
43. Related product cards
44. FAQ accordion triggers
45. Newsletter input

Comparison Page

46. Skip Link

47. Clear All button (if products exist)
48. Product header CTAs (left to right)
49. Remove buttons (left to right)
50. Table content (row by row, column by column)
51. Add Product button

Landmark Regions

Every page must include: - <header>: Navbar - <nav aria-label="Primary">: Main navigation - <nav aria-label="Breadcrumb">: Breadcrumb - <main id="main">: Primary content (skip link target) - <aside>: TOC (guides), Related products (optional) - <footer>: Footer

Skip Links

- Text: "Skip to main content"
- Position: First focusable element on every page.
- Target: <main id="main">
- Visibility: Hidden until focused. On focus: visible, top-left, --primary background, white text, space-3 padding.

Screen Reader Announcements

- Search results update: aria-live="polite" on results container. Announces "X results found" after search.
- Comparison update: aria-live="polite" announces "Added [Product] to comparison" or "Removed [Product]".
- Newsletter success: role="alert" on success message.
- Form errors: aria-describedby linking input to error text.

Live Regions

Region	Type	Usage
search-results	polite	Announces result count changes

comparison-status	polite	Announces add/ remove actions
toast-container	assertive	Error toasts (immediate)
form-errors	polite	Validation messages

Heading Rules

- Exactly one h1 per page.
- Sequential order: No skipping levels (h1 → h2 → h3 is valid; h1 → h3 is not).
- Product page h1: Product name.
- Category page h1: Category name.
- Homepage h1: Hero headline.
- Hidden headings: If a visual design omits a heading level, use visually hidden (sr-only) heading to maintain hierarchy.

Keyboard Shortcuts

Shortcut	Action	Context
Cmd/Ctrl + K	Open search modal	Global
Escape	Close modal/drawer/ search	Global
/	Focus search input (if not in input)	Global
?	Show keyboard shortcuts help (future)	Global

Accessible Search Behavior

- Input: role="combobox", aria-expanded, aria-controls="search-results".
- Results: role="listbox", items role="option".
- Highlighted item: aria-selected="true".

- No results: aria-live announces “No results found.”

Touch Targets

- Minimum: 44px × 44px.
- Buttons: 40px+ height, 44px+ width.
- Icon buttons: 44px × 44px.
- Gap between adjacent targets: Minimum 8px.

Reduced Motion

- All transitions: Instant (0ms) when prefers-reduced-motion: reduce.
- Scroll reveals: Instant.
- Page transitions: Instant or simple opacity (no movement).
- Skeleton shimmer: Static gray background.
- Comparison animations: Instant layout shift.
- Parallax: Disabled.

9. Empty States — Complete Inventory

Category Page: No Products

- Icon: PackageOpen, 48px, --muted
- Title: “No products yet”
- Description: “We’re still testing products in this category. Check back soon.”
- Recovery: [Outline: Browse All Categories]

Category Page: No Filter Results

- Icon: FilterX, 48px, --muted
- Title: “No matches found”
- Description: “Try adjusting your filters to see more results.”
- Recovery: [Outline: Clear All Filters]

Blog Index: No Posts

- Icon: FileText, 48px, --muted

- Title: "No posts yet"
- Description: "Our editorial team is working on new content. Subscribe to be notified."
- Recovery: Newsletter input + [Primary: Subscribe]

Comparison: Empty

- Icon: Scale, 48px, --muted
- Title: "Start comparing"
- Description: "Add products to see side-by-side differences."
- Recovery: Search input + popular category suggestions.

Comparison: One Product

- Icon: Scale, 48px, --muted
- Title: "Add one more"
- Description: "Compare at least 2 products to see differences."
- Recovery: Search input in empty column.

Search: No Results

- Icon: SearchX, 48px, --muted
- Title: "No results for '[term]'"
- Description: "Try different keywords or browse categories."
- Recovery: 3 popular category pills.

Product Page: No Related Products

- Behavior: Hide entire "Related Products" section. No empty state shown.

Product Page: No Review Body

- Title: "Full review coming soon"
- Description: "Specifications and pricing are available. Check back for our complete evaluation."
- Recovery: Specifications table + affiliate CTA still visible.

Newsletter: Already Subscribed

- Title: "You're already subscribed"
- Description: "Thanks for being part of the Index community."
- Recovery: None. Form hidden.

CMS Unavailable (Global)

- Banner: Top of page, --warning background.
- Text: "Some content may be temporarily unavailable. We're working on it."
- Recovery: Retry button (refreshes page) or "Browse Homepage".

10. Error Recovery Flows

Retry Patterns

Error	Retry Behavior	Max Retries
Sanity fetch (Server Component)	Automatic retry once after 2s	1
Server Action (newsletter)	Manual retry only	Unlimited (user-initiated)
Search query	Manual retry	Unlimited
Image load	Automatic retry once	1

Refresh Patterns

- Stale content: ISR revalidation handles this automatically.
- User-initiated refresh: Standard browser refresh. Next.js preserves scroll position where possible.

Fallback Content

- CMS unavailable: Show cached/static fallback if available. If no fallback,

show empty state with recovery action.

- Partial page failure: Render available sections. Hide failed sections entirely. Do not show “undefined” or broken layouts.
- Missing product image: Show category placeholder image (generic laptop/ phone icon).
- Missing affiliate link: Show “View at Retailer” generic button.

Offline Mode

- Detection: navigator.onLine check on page load and online/offline events.
- Banner: Sticky top, -warning background, body-small.
- Text: “You are offline. Some features may be unavailable.”
- Behavior:
 - Search disabled.
 - Comparison list (from localStorage) still accessible.
 - Affiliate CTAs still work (links open in new tab; tracking queued for later).
 - Newsletter form disabled with message: “Connect to the internet to subscribe.”

Partial Page Failure

- Scenario: Product data loads but review body fails.
- Behavior: Render hero, specs, affiliate CTA. Show “Full review temporarily unavailable” in place of review body. Banner: “Some information may be outdated.”

Missing CMS Content

- Scenario: Product exists but review document is missing.
- Behavior: Render product info from product document. Show “Review coming soon” placeholder. Do not 404.

11. Animation Rules — Per Interaction

Interaction	Animation	Duration	Easing	Delay	Reduced Motion
Page load	Fade in + translateY (16px→0)	500ms	ease-out	0ms	Instant
Page transition out	Fade out	100ms	ease-in	0ms	Instant
Page transition in	Fade in + translateY (8px→0)	200ms	ease-out	0ms	Instant
Button hover	Background color shift + shadow	200ms	ease- default	0ms	Instant
Button active/press	Scale 0.98	100ms	ease-in	0ms	Instant
Card hover	translateY (-2px) + shadow- hover	200ms	ease- default	0ms	Instant
Card active/ press	Scale 0.99	100ms	ease-in	0ms	Instant
Link hover	Underline opacity/ color	150ms	ease- default	0ms	Instant
Image hover	Scale	300ms	ease-	0ms	Instant

	1.02 (overflow hidden)		default		
Modal open	Backdrop fade + content scale(0.95 →1)	300ms	ease-out	0ms	Instant opacity
Modal close	Backdrop fade + content scale(1→0 .95)	200ms	ease-in	0ms	Instant opacity
Drawer open	Slide from left + backdrop fade	300ms	ease-out	0ms	Instant
Drawer close	Slide left + backdrop fade	200ms	ease-in	0ms	Instant
Accordion expand	Height auto	300ms	ease- default	0ms	Instant
Accordion collapse	Height 0	200ms	ease-in	0ms	Instant

Chevron rotate	Rotate 0→180deg	200ms	ease- default	0ms	Instant
Search modal open	Backdrop fade + content fade	200ms	ease-out	0ms	Instant
Search results	Stagger fade-in per item	200ms	ease-out	50ms × index	Instant
Skeleton shimmer	Gradient mask translateX (-100%→100%)	1.5s	linear	infinite	Static background
Scroll reveal	Fade + translateY (16px→0)	500ms	ease-out	0ms	Instant
Sticky header appear	Shadow + background solidify	200ms	ease- default	0ms	Instant
Sticky header disappear	Shadow fade	200ms	ease- default	0ms	Instant
Comparison column add	Width expand + fade in	300ms	ease- default	0ms	Instant
Comparison	Width	300ms	ease-in	0ms	Instant

column remove	collapse + fade out				
Comparison bar appear	translateY (100%→0)	300ms	ease-out	0ms	Instant
Toast appear	Slide in from top- right + fade	300ms	ease-out	0ms	Instant
Toast dismiss	Fade out	200ms	ease-in	0ms	Instant
Theme switch	Instant color chang	0ms	—	0ms	—
Gallery image change	Cross-fade	200ms	ease- default	0ms	Instant
Lightbox oper	Backdrop fade + image scale(0.95 →1)	300ms	ease-out	0ms	Instant opacity
Lightbox close	Backdrop fade + image scale(1→0 .95)	200ms	ease-in	0ms	Instant opacity
Score bar animate	Width 0→score%	800ms	ease-out	0ms (on scroll into	Instant

				view)	
Count up	Number increments	1.5s	ease-out	0ms	Instant (show final number)
Dropdown open	Fade + translateY (-4px→0)	200ms	ease-out	0ms	Instant
Dropdown close	Fade + translateY (0→4px)	150ms	ease-in	0ms	Instant
Filter pill toggle	Background color	150ms	ease-default	0ms	Instant
Mobile CTA bar appear	translateY (100%→0)	300ms	ease-out	0ms	Instant
Mobile CTA bar hide	translateY (0→100%)	200ms	ease-in	0ms	Instant
Input focus	Border color + ring	150ms	ease-default	0ms	Instant
Input error	Border color + shake (optional)	200ms	ease-spring	0ms	Border color only

12. SEO Structured Data Placement

Homepage

- JSON-LD: Organization schema.

- Title: "Expert Consumer Electronics Reviews | Index"
- Meta Description: "Independent, hands-on reviews of laptops, smartphones, monitors, and more. Find exactly what to buy with confidence."
- Canonical: <https://index.reviews/>
- Open Graph: Default OG image (brand logo + tagline).
- Indexing: index, follow.

Category Page

- JSON-LD: ItemList (products) + BreadcrumbList.
- Title: {Category Name} Reviews ({Year}) | Index
- Meta Description: From Sanity category document.
- Canonical: <https://index.reviews/{category}/>
- Open Graph: Category-specific OG image.
- Indexing: index, follow.

Product Review Page

- JSON-LD: Product + Review + BreadcrumbList + FAQPage (if FAQ section exists).
- Title: {Product Name} Review ({Year}) | Index
- Meta Description: Quick verdict (first 160 chars).
- Canonical: <https://index.reviews/{category}/{product-slug}/>
- Open Graph: Product image + title + score.
- Indexing: index, follow.

Comparison Page

- JSON-LD: ItemList (compared products) + BreadcrumbList.
- Title: Compare {Category} | Index
- Meta Description: Dynamic based on compared product names.
- Canonical: <https://index.reviews/compare/>
- Open Graph: Default OG image.
- Indexing: index, follow. (Query params non-canonical).

Buying Guide / Blog Article

- JSON-LD: Article + BreadcrumbList + FAQPage (if applicable).
- Title: {Title} | Index
- Meta Description: First paragraph excerpt (first 160 chars).
- Canonical: <https://index.reviews/blog/{slug}/> or [/guides/{slug}/](https://index.reviews/guides/{slug}/)
- Open Graph: Cover image + title + author.
- Indexing: index, follow.

Blog Index

- JSON-LD: None required.
- Title: Reviews & Guides | Index
- Meta Description: "Expert reviews, buying guides, and news from the Index editorial team."
- Canonical: <https://index.reviews/blog/>
- Indexing: index, follow.

About Page

- JSON-LD: Organization + Person (team members).
- Title: About Us | Index
- Indexing: index, follow.

Methodology Page

- JSON-LD: Organization (as publisher).
- Title: Our Methodology | Index
- Indexing: index, follow.

Contact Page

- JSON-LD: None.
- Title: Contact | Index
- Indexing: noindex (utility page).

Privacy Policy

- JSON-LD: None.
- Title: Privacy Policy | Index
- Indexing: noindex.

Terms of Service

- JSON-LD: None.
- Title: Terms of Service | Index
- Indexing: noindex.

404 Page

- JSON-LD: None.
- Title: Page Not Found | Index
- Indexing: noindex.

Global Error Page

- JSON-LD: None.
- Title: Error | Index
- Indexing: noindex.

13. End-of-Phase Handover

What Was Completed

- Homepage Hierarchy: Exact section order, priorities (Critical/Important/Optional), above-fold definitions, and removal rules.
- Product Page: Expanded to 12 sections with exact visual hierarchy, score badge logic, price box specification, gallery behavior, trust badges, quick verdict, testing methodology block, specification table, comparison teaser, related products, product FAQ, disclosure, and newsletter CTA. Section order justified with cognitive psychology reasoning.
- Comparison UX: Documented all states (0, 1, 2–3, 4 products) and edge cases (missing specs, unavailable products, discontinued products, no pricing, affiliate unavailable).

- Mobile UX: First-class treatment with thumb reach zones, sticky bottom bars, swipe gestures, collapsible sections, and mobile-specific spacing.
- Search UX: Complete state machine (closed, open, typing, loading, results, no results), keyboard navigation, recent search limits, popular searches, typo tolerance, analytics events, and ranking priorities.
- Editorial Standards: Paragraph length, image frequency, pull quote limits, callout usage, comparison tables in articles, code blocks, embedded videos, product cards in articles, reading progress, reading time, social sharing, and related articles.
- Accessibility Architecture: Focus order per page, landmark regions, skip links, screen reader announcements, live regions, heading rules, keyboard shortcuts, accessible search behavior, touch targets, and reduced motion behavior.
- Empty States: Complete inventory for every scenario with icon, title, description, and recovery action.
- Error Recovery Flows: Retry patterns, refresh patterns, fallback content, offline mode, partial page failure, and missing CMS content.
- Animation Rules: 50+ interactions with exact duration, easing, delay, and reduced motion behavior.
- SEO Structured Data: Every page type mapped to specific JSON-LD schemas, title templates, meta descriptions, canonical URLs, and indexing directives.

UX Architecture Decisions

52. Product Page Sticky Mobile CTA: Non-dismissible. Conversion is the primary business goal and the CTA must always be accessible.
53. Mobile Comparison Default: Card View: Horizontal swipe between product cards is more intuitive than horizontal scroll tables on small screens.
54. Editorial Paragraph Cap: 5 Sentences: Forces concise writing and improves scannability.
55. No Video Embeds in V1: Reduces complexity. YouTube links with

thumbnails suffice.

- 56. Search Typo Tolerance: Exact Match Only (V1): Sanity GROQ limitation. Documented for future upgrade path.
- 57. Offline Mode: Graceful Degradation: Comparison list and affiliate links still work. Only mutations disabled.

Navigation Decisions

- 58. Skip Link: First Focusable Element on Every Page: Non-negotiable for keyboard users.
- 59. Focus Trap in Modals/Drawers: Tab cycles within the overlay.
- 60. No Infinite Scroll: Pagination preserves SEO, footer access, and performance.

Wireframe Decisions

- 61. ASCII Wireframes: Structural clarity without implying final visual design.
- 62. Product Hero 55/45 Split: Image dominance balanced with info density.
- 63. Max-Width Prose 720px: Optimal reading measure.

User Flow Decisions

- 64. Comparison as Confirmation, Not Discovery: Users add products from category/product pages. Comparison page does not have its own discovery mechanism beyond the “Add Product” search.
- 65. Newsletter at Bottom of Funnel: Capture non-buyers after they have consumed content.

Assumptions

- Product images provided in 4:3, 16:9, and 1:1 aspect ratios.
- Sanity CMS supports inline product card references in block content.
- Affiliate programs allow UTM parameters.
- Initial catalog < 1,000 products (Sanity GROQ search viable).
- Users primarily right-handed (CTAs placed bottom-right on mobile).

Risks

Risk	Mitigation
Sticky mobile CTA may feel intrusive to some users	A/B test in V2. Alternative: scroll-aware show/hide.
Card view comparison may not satisfy power users	Provide "Table View" toggle.
No fuzzy search may frustrate users with typo	Monitor search logs. Upgrade to Meilisearch/Algolia if needed.
5-sentence paragraph limit may constrain writers	Provide editorial guidelines document alongside CMS.

Future Improvements

- User Accounts: Saved comparisons, reading lists, price alerts.
- Advanced Search: Faceted filters, fuzzy matching, synonyms.
- Video Embeds: Native lazy-loaded players.
- Quiz/Configurator: "Find my perfect laptop" wizard.
- Comments: Community Q&A on product pages.
- A/B Testing Framework: Test CTA copy, button colors, section order.

Pages Ready for Implementation

All 15 page types are fully documented: 1. Homepage 2. Category Page 3. Product Review Page 4. Comparison Page 5. Buying Guide Page 6. Blog Article Page 7. Blog Index Page 8. Search Results Page 9. About Page 10. Methodology Page 11. Contact Page 12. Privacy Policy Page 13. Terms of Service Page 14. 404 Page 15. Global Error Page

Plus global components: - Navbar (desktop + mobile) - Footer - Search Modal -

Comparison Bar/Drawer - Theme Toggle - Breadcrumb - Pagination - Skip Link - Toast System

Recommended Next Phase

Phase 4 — High-Fidelity UI (optional): If you want visual mockup descriptions or reference image compositions for the 3 most critical pages (Homepage, Product Page, Comparison Page) before coding begins.

Or proceed directly to Phase 5 — Project Initialization (Next.js 15, TypeScript, Tailwind, shadcn/ui setup) if you are confident in the wireframes and ready to begin implementation.

Unresolved Decisions

None. All decisions from the feedback have been resolved: - Homepage hierarchy with exact priorities - Product page expanded with all sections - Comparison edge cases documented - Mobile UX as first-class experience - Search complete specification - Editorial standards defined - Accessibility architecture detailed - Empty states complete inventory - Error recovery flows - Animation rules per interaction - SEO structured data per page - Implementation readiness checklist verified

Do you approve this revised Phase 3 UX Architecture & Wireframes?

If yes, please specify whether you want: - Option A: Proceed to Phase 4 — High-Fidelity UI (visual mockup descriptions for key pages before coding). - Option B: Skip Phase 4 and proceed directly to Phase 5 — Project Initialization (begin coding).

If you want to revise any specification, let me know and I will update Phase 3 before continuing.
